

POSSIBILITIES / TECHNOLOGY

OPENSTACK

OpenStack is dedicated to producing the leading open source cloud computing platform for public and private clouds. A member of the OpenStack alliance since 2011, Brocade has embraced this platform to promote multivendor and system-to-system interoperability for cloud networking environments. Brocade supports OpenStack users in three ways:

The **Brocade data center portfolio** delivers the network visibility, extensibility, and adaptability for changing environments offered by OpenStack

Brocade is drawing on its data center networking expertise to contribute architectural enhancements to the core OpenStack framework

Brocade partners with leading OpenStack distributors such as **RedHat** and **Mirantis** to offer a consumable, supported path to orchestrating the On-Demand Data Center, powered by Brocade
