Our OpenStack Portfolio

Manage containerized, virtualized and bare metal applications across public, private and hybrid clouds – using one standard set of APIs.

Public Cloud

Whether you're developing a new app or deploying code to production, the Rackspace Public Cloud provides nearly instant access to a scalable, reliable and secure platform that makes it easy for you to start and grow with your business.

[Learn More](#)
[\(/openstack/public\)](https://www.rackspace.com/openstack/public)

Private Cloud

Rackspace Private Cloud includes an industry-leading 99.99% OpenStack API uptime SLA. We can build an OpenStack private cloud for you that can be hosted at Rackspace, collocated in a third-party data center, or hosted in your own data center.

Hybrid Cloud

Sometimes the best fit for a site or app requires both cloud and dedicated environments. That's why we've created a true hybrid cloud — so you can connect public cloud, private cloud and dedicated hardware, to create the best fit for your specific needs.

OpenStack, Made Simple

Proven Operational Expertise

Nobody knows OpenStack better than Rackspace. We founded OpenStack with NASA in 2010, operate the world's largest OpenStack cloud and have experience scaling OpenStack clouds to thousands of nodes.

Industry-Leading Reliability

We back our OpenStack solutions with industry-leading SLAs including a 99.99% API uptime guarantee for private clouds and a 100% network availability guarantee for clouds in a Rackspace data center.

OpenStack Everywhere

We deliver fully-managed OpenStack private clouds in any data center in the world, enabling you to get close to your customers to maximize response times while meeting security, compliance and data sovereignty requirements.
