The OpenStack Marketplace will help you make an informed decision, whether you're building a cloud, looking to use one by the hour, or pursuing a hybrid model.

Building a cloud

- You'll want to understand which Software Distributions (/marketplace/distros/) and Converged Appliance (/marketplace/distros/) options there are.
- Many users start by hiring experts, which you can find in our Consultants and System Integrators (/marketplace/consulting/) section.
- Want to train your staff? Check out our Training (/marketplace/training/) section.
- Wondering if your compute, storage, and networking gear has compatible drivers? Check out the Drivers section (/marketplace/drivers/) to learn the status of ongoing testing.

Using a cloud

There are OpenStack powered public clouds all over the world. Explore the possibilities.

Why a marketplace?

A key part of the OpenStack Foundation mission is to inform, and with the ever expanding ecosystem, we felt it was a good time to cut through the noise to give our members the facts needed to make sound decisions.

We break it down for you with the OpenStack details like *which components are included*, the *versions used*, and the *APIs exposed*. We've also implemented interoperability testing (/interop) to validate OpenStack Powered products,and the results are now available in the Marketplace for public clouds, hosted private clouds, distributions & appliances.

Training & Certification

OpenStack training courses and workshops are happening daily online and around the world thanks to dozens of training partners. Whether you are installing OpenStack for the first time or interested in advanced networking, there's a course for you in the Training Marketplace (https://www.openstack.org/marketplace/training).

The OpenStack Foundation will offer its first professional certification, Certified OpenStack Administrator (COA), in Q2 2016. Learn more about the certification and sign up for updates (coa).

Look for these logos

When evaluating OpenStack related products, look for these logos which indicate products that have met the necessary requirements:

Be Featured In The Ecosystem

Does your company offer a product or service that you think fits in the Marketplace? Check out this overview (https://www.openstack.org/assets/marketplace/join-the-marketplace.pdf) (PDF), then contact us (mailto:ecosystem@openstack.org) for next steps on how to join. You can also learn more about the logo licensing programs here (https://openstack.org/brand).
