Hear from Google, Harvard, eBay and more at the OpenStack Summit Boston, May 8-11.   REGISTER NOW (HTTPS://BIT.LY/2EZHA37)

The OpenStack Foundation

The OpenStack Foundation promotes the global development, distribution and adoption of the OpenStack cloud operating system. As the global independent home for OpenStack, the Foundation serves more than 60,000 Individual Members from over 180 countries around the world.

The goal of the OpenStack Foundation is to serve developers, users, and the entire ecosystem globally by providing a set of shared resources to grow the footprint of public and private OpenStack clouds, enable technology vendors targeting the platform and assist developers in producing the best cloud software in the industry.
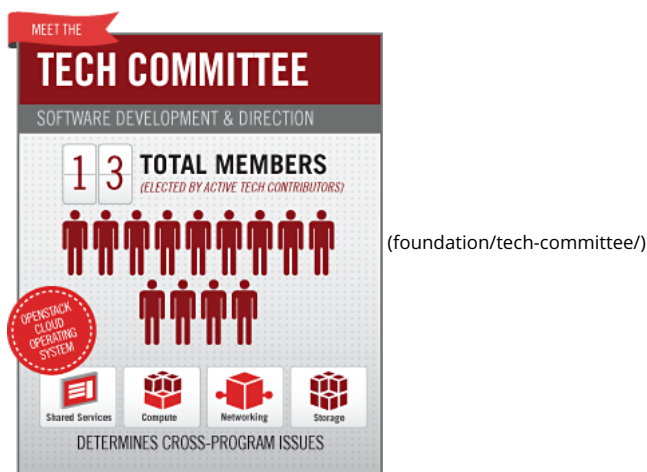

Like the software, individual membership within the OpenStack Foundation (join/) is free and accessible to anyone. Individual Members are expected to participate in the OpenStack community through technical contributions or community building efforts.

The Foundation wouldn't be possible without the support of so many innovative companies that have contributed in many different ways. To learn more about our Platinum, Gold, Corporate Sponsors and other supporters, check out our supporter recognition page (/foundation/companies/). If your company is interested in becoming a supporter, read more about it here (/join/#sponsor).

For more insight into OpenStack Foundation activities and progress, please read the annual reports:

- 2016 annual report (assets/reports/OpenStack-2016-Annual-Report-final-draft.pdf)
- 2015 annual report (assets/reports/osf-annual-report-2015-FINAL.pdf)
- 2014 annual report (assets/reports/osf-annual-report-2014.pdf)

Technical Committee

 (foundation/tech-committee/)

OpenStack Technical Committee members define and steward the technical direction of OpenStack software, including cross-program issues. The committee of 13 is fully elected by the project's Active Technical Contributors.

Meet The Technical Committee (foundation/technical-committee/)

Board of Directors

 (foundation/board-of-directors/)

The Board of Directors provides strategic and financial oversight of Foundation resources and staff. Alan Clark, Director of Industry Initiatives, Emerging Standards and Open Source at SUSE, was elected Chairman of the Board, and Lew Tucker, Vice President and CTO of Cloud Computing at Cisco, was elected Vice Chairman of the Board.

Meet The Board of Directors (foundation/board-of-directors/)

User Committee

 (foundation/user-committee/)

Tim Bell, Operating Systems and Infrastructure Services Group Leader at CERN, was appointed by the Board of Directors to help establish a new User Committee, created to represent a broad set of enterprise, academic and service provider users with the Technical Committee and Board of Directors.

Foundation Staff & Shared Resources

Led by Executive Director, Jonathan Bryce, and Chief Operating Officer, Mark Collier, the Foundation staff are focused on carrying out the OpenStack mission under the strategic direction of the Board. Specific responsibilities include coordinating the project's infrastructure, such as systems for testing the software at scale, community building activities, and managing the OpenStack trademark.

Job Opportunities at OpenStack Foundation

OpenStack Foundation provides equal employment opportunities (EEO) to all employees and applicants for employment without regard to race, color, religion, sex, national origin, age, disability or genetics. In addition to federal law requirements, OpenStack Foundation complies with applicable state and local laws governing nondiscrimination in employment in every location in which the company has facilities. This policy applies to all terms and conditions of employment, including recruiting, hiring, placement, promotion, termination, layoff, recall, transfer, leaves of absence, compensation and training.

OpenStack Foundation expressly prohibits any form of workplace harassment based on race, color, religion, gender, sexual orientation, gender identity or expression, national origin, age, genetic information, disability, or veteran status. Improper interference with the ability of OpenStack Foundation's employees to perform their job duties may result in discipline up to and including discharge.
