OpenStack Technical Committee

The OpenStack Technical Committee is one of the governing bodies of the OpenStack project. It is an elected group that represents the contributors to the project, and has oversight on all technical matters.

The Technical Committee is formally defined in the OpenStack Foundation bylaws (in particular article 4.1(b), article 4.13 and Appendix 4) and further refined in the *OpenStack Technical Committee Charter*.

These pages contain OpenStack Technical Committee reference documents and track official resolutions voted by the committee.
